## EXPERIENCE

### Sparsa Digital Pvt Ltd

July 2024 - Current

- Worked extensively on various platforms such as CMS, ERP, and UI, ensuring seamless integration and user-friendly interfaces.
- Leveraged jQuery, Node.js, and PHP for efficient backend and front-end development, enhancing platform functionality.
- Utilized multiple CSS frameworks to build responsive and consistent UI components across projects.

### Paavu Technologies Pvt Ltd

May 2023 - June 2024

- Developed and optimized reusable code for both front-end and back-end, enhancing project efficiency and maintainability.
- Transformed XHTML into fully responsive HTML using CSS, improving user experience across devices.
- Worked on ReactJS projects, integrating various CSS frameworks and incorporating backend functionality with Node.js for enhanced performance.

### Accurate Engineers

October 2022 - March 2023

- Designed and launched engaging landing pages, driving increased user interaction and conversion rates through Angular development.
- Converted PSD into responsive designs using Angular, HTML, CSS/Bootstrap, and JavaScript, collaborating with Figma for design accuracy.
- Redesigned pop-up forms with Angular, improving user engagement and form submission rates, incorporating backend functionalities for seamless processing.

## EDUCATION

### Bachelors in Computer Science Engineering (B.Tech)

2019 - 2023

KIIT College of Engineering - MDU, Rohtak

### Senior Secondary in Science

2018 - 2019

Drona Public School - Gurgaon

## PROJECTS

### VHL (HTML, CSS, Bootstrap, Git)

- Features:** Streamlined book structure generation using HTML, CSS, and Bootstrap, reducing manual effort by **50%**. Customizable templates and responsive design foster creativity and accessibility in book creation, enhancing user experience and productivity.
- Impact:** Accelerated project timelines by up to **3+** months, showcasing frontend development proficiency and achieving significant cost savings.

### Readify: Ecommerce (ReactJS, Vite, Tailwind)

- Features:** ReactJS-powered single-page app delivers an intuitive design, seamless navigation, a diverse product catalog, and swift cart functionality, ensuring a smooth and engaging shopping experience.
- Impact:** Demonstrated proficiency in React.js and frontend development ensures enhanced user engagement, increased conversion rates, and fosters brand loyalty, leveraging streamlined navigation and swift page loads to foster brand loyalty and achieve a competitive advantage.

### Drama: movies database application (Reactjs, SCSS, API, Redux)

- Features:** Orchestrated a React-driven movie database website, fortified with Redux and database APIs, executing **10+** requests for robust data acquisition and enhancing seamless user interaction.
- Impact:** Significantly enhanced user experience, accessibility, and career portfolio, streamlining navigation, ensuring accurate data retrieval, and garnering positive user feedback.

### Speech Recognition Website (Tailwind, Vite, ReactJs)

- **Features:** This speech recognition marvel translates spoken words into text with lightning speed, employing an ingenious fusion of customizable settings and responsive design.
- **Impact:** By seamlessly converting speech to text in real-time, demonstrating technical prowess and innovation, leveraging React, this website enhances accessibility, communication efficiency, and user satisfaction, while also demonstrating technical prowess and innovation, positioning you as a proficient and forward-thinking developer.

### Task Management (NextJs, Style Modules)

- **Features:** The Task Management App offers 4 core features: adding, editing, deleting, and marking tasks as completed. It supports sorting by 3 priority levels with color-coding and provides a responsive design for all devices.
- **Impact:** The app boosts productivity by organizing tasks across 3 priority levels, making it easy to focus on urgent tasks. With task persistence and a search feature, it ensures efficient and streamlined task management.

## SKILLS

---

### Languages

HTML, CSS, SCSS, JavaScript

### Tools & Technologies

ReactJS, Tailwind CSS, TypeScript, Bootstrap, Material UI, Redux, Git, GitHub

### Others

UI Design, API Integration (REST API), Responsive Design
